To exceed customer expectations by providing exceptional exterminating services in an ethical, expedient, and economical manner.

### VALUES

---

Honestly, integrity, and respect for our customers direct our business decisions today and in the planning for our future.

## Termite Management Services

## WHAT ARE TERMITES?

Termites or 'White ants' as they are commonly known are social insects. Subterranean termites live underground in a colony comprising of queen, king, workers and soldiers. There could be millions below the ground, inside walls, furniture etc. termites are the biggest threat to assets which man cherishes to own. Studies in the Usa have proved that termites cause more damage than Fires, Floods and Cyclones every year.

## TERMITES – THE ASSETS DESTROYER

Termites are silent destroyers. By the time they surface, 80% of the damage would have been done they feed on anything containing cellulose ranging from wooden furniture to books.

## WHY NEEDED THIS TREATMENT?

### Why Terminet?

# REX Fogging Service

An ISO 9001:2008 certified company

## WHY NEEDED THIS TREATMENT ?

Rex FOGGING is ideal for poultry farms, bungalows, party lawns, housing societies, farm houses, schools, industries, gram panchayats etc. The advantage is it covers small areas effectively and uses LPG as burner fuel. AMC available at selected towns.

## ADVANTAGES

Mosquitoes are Menace, Nuisance and Vector of Various life endanging diseases. Its bite is deadlier than the pain it inflicts. Fatal diseases like Malaria, Dengue and Japanese encephalitis commonly known as Brain fever get transmitted by these tiny creatures.

## RAT-X Services

REX Rodent Management Services has been targeted to provide the total and effective control of rats and mice the new age RAT-X Services is based on type of rodent species, extent of infestation & its spread. There is no single or one answer for rodent control. However, It's a combination of baiting, trapping & proofing methods.

## WHY NEEDED THIS TREATMENT ?

### Features and Benefits

The baits are placed in strategic locations where the rodents frequently visit.

Use of Glue boards/traps etc. is a part of rodent pest management operations and will be carried out wherever needed.

RAT-X treatment uses registered product.

It is designed keeping human safety in mind.

Targeted at total control.

REX Experts will also suggest the sanitation and rodent proofing measures to be carried out from time to time to prevent the rodent entry in the premises.

### THE ADVANCED RODENT MANAGEMENT SERVICE

**Rodents:** The term rodents implies to rats, Mice and Bandicoot. The rodents have become one of the most important urban pests. With the sole exception of man, the most successful and abundant mammals on the earth today are the commensal Rats and Mice. They enjoyed this success with men in advent help they live at man's expense, invading his home, eating his food and damaging his commodities. They are also responsible for transmitting various diseases to man. They contaminate his food with their faces, urine and hairs. Their gnawing ability is responsible for not only structural and property damage but also short circuits and fires. They nibble at few cables and entire communication or computer network collapses.

Man regarded rodents as little more than household pests until he realized the damage potential of the rodents. In reality man's indifference, ignorance and lack of attention to sanitation helped rodent population and made this control a tougher task.

## Cock-REX Treatment

REX Cock-REX Service provides total and effective control of German and American cockroaches and other common pests such as red and black ants/silverfish/spiders etc. In this service the highly potent active ingredient in Gel form is applied at all cockroach hideouts. In addition to that, Odourless Spray treatment is carried out at strategic locations. This results in control of cockroaches And other pests And gives sustained relief.

## THE ADVANCED COCKROACH MANAGEMENT SERVICE

**Incidence of cockroaches:** The cockroaches are the most common pests in the homes, restaurants, hotels, ware houses & offices. They do not discriminate between food and filth. Their small body size helps them to hide in tiny crack and crevice. Their presence is not only annoying but also unhygienic due to their stinking body secretion. They not only contaminate food and utensils but also take active part in the spread of disease causing organisms leading to dysentery, diarrhoea and salmonellosis (food poisoning). The cockroaches are positively linked to human allergens leading to asthma. Cockroaches impart dark stains and unpleasant odors to the surface they frequent, giving impression of unhygienic conditions.

Cockroach disease can affect humans. Cockroaches are known to carry diseases like dysentery, typhoid and poliomyelitis, as well as gastroenteritis.
